# DR MAC'S LITTLE GUMMIES

We would like to invite your child to have a gentle introduction to our dental office.

Prevention of dental decay starts early and sets the stage for lifelong oral health. This complimentary dental visit for one and two year olds will stress the importance of primary teeth and give parents instructions in proper hands on teeth cleaning, nutritional counseling and fluoride recommendations.

Successful preventive care and regular check-ups are an integral part of your child's health.
